FEBRUARY 2016

Company News

In line with the customer demand for higher bandwidth at competitive price, Aries Telecoms is planning to introduce a high speed broadband to the business community at selected market centres. Aries INFINITY is the latest product to be introduced by Aries Telecoms into the market and will be officially launched by the first week of April 2016.

Aries INIFINITY service is an ultra-high speed broadband service that offers bandwidth of up to 1,000 or 1Gbps to the business users. The high speed connection is carried over Aries Telecoms' next-generation fibre optic network utilising the latest state-of-the-art DWDM and Metro-Ethernet network system. The service enables super-fast download and upload of data without limitation.

Aries INFINITY is now available on commercial trial to a selected buildings and targeted for business that located in Klang Valley. Take a moment to discover the new ultra-high speed broadband by visiting our gallery and feel the experience for Aries INFINITY at our corporate office in The Constellation, KL Sentral.

At the same time please aslo visit our new website to see how we've changed. We are committed to your satisfaction and welcome your feedback. We'll do all we can to make your Aries Infinity experience positive.

As always, thank you for choosing Aries Telecoms
